Re: Summary of Asbestos Containing Materials by Building
Upgrade Electrical Distribution System – Various Buildings
SUCF Project No. 12290
SUNY Potsdam
Potsdam, New York

Dear Mr. Robbins:

Enclosed please find a copy of the summary of asbestos containing materials in client-defined areas of twenty two buildings on the SUNY Potsdam campus located at 44 Pierrepont Avenue, Potsdam, New York. A comprehensive pre-renovation asbestos and lead inspection report shall be sent as a separate document after all results are evaluated in our office.

If after reviewing this summary you have any questions, or if we can be of assistance in any other way, please do not hesitate to call. Thank you for the opportunity to be of service to C&S Engineers and SUNY Potsdam.

Sincerely,

Susanne Kelley
President

SIENNA ENVIRONMENTAL TECHNOLOGIES, LLC

Summary of Asbestos Containing Materials

Introduction

Sienna Environmental Technologies was retained by C&S Engineers to perform an investigation of select areas of twenty two buildings on the SUNY Potsdam Campus in Potsdam, New York for the presence of suspect asbestos-containing materials. The inspection was limited to suspect materials present at client-defined locations of the buildings to be disturbed during the proposed renovation of the electrical distribution systems.

Sienna was charged with:

* Locating suspect asbestos containing materials at client defined locations
* Sampling of these materials to ascertain asbestos content
* Identifying the locations, quantities and conditions of confirmed asbestos containing materials

Samples were analyzed using PLM, Polarized Light Microscopy in accordance with NYS DOH ELAP Item #198.1 and/or #198.6. For materials classified as non-friable organically bound materials (NOBs), additional analysis was performed under Transmission Electron Microscopy (TEM) in accordance with NYS DOH ELAP Item #198.4. The results of the analyses confirmed whether or not a suspect material contained asbestos.

SIENNA ENVIRONMENTAL TECHNOLOGIES, LLC
429 Franklin St. · Suite 102 · Buffalo, NY 14202 · Ph: 716-332-3134 · Fax: 716-332-3136

Executive summary

The asbestos survey included identification, sampling, analysis and quantification of suspect materials within client defined areas of twenty two buildings located on the SUNY Potsdam campus which may be disturbed by current renovation plans.

A. Suspect asbestos-containing materials

The inspection was conducted between December 9, 2008 and December 17, 2008 and revealed the following materials as requiring sampling and analysis:

Raymond Hall

HAN Number	Description
RAY-100A / 200A	Drywall
RAY-100B / 200B	Drywall joint compound
RAY-101	Cinder block mortar
RAY-201	1x1 Spline dot and fissure ceiling tile
RAY-202	2x2 dot and texture ceiling tile

Morey Hall

HAN Number	Description
MOR-100A / 200A	Sand finish plaster skim coat
MOR-100B / 200B	Sand finish plaster base coat
MOR-101A / 202A	Smooth plaster skim coat
MOR-101B / 202B	Smooth plaster base coat
MOR-102A / 201A	Drywall
MOR-102B / 201B	Drywall joint compound

MacVicar Hall

HAN Number	Description
MCV-100A / 200A	Sand finish plaster skim coat
MCV-100B / 200B	Sand finish plaster base coat
MCV-201A	Ceiling smooth plaster skim coat
MCV-201B	Ceiling smooth plaster base coat

Stillman Hall

HAN Number	Description
STL-100A / 200A	Drywall
STL-100B / 200B	Drywall joint compound
STL-201	2x2 dot and large fissure ceiling tile

SIENNA ENVIRONMENTAL TECHNOLOGIES, LLC

B. Confirmed asbestos-containing materials

Sampling and analysis of the suspect materials under Polarized Light Microscopy, and where necessary under Transmission Electron Microscopy, confirmed the following materials as asbestos containing building materials (laboratory reports and chains of custody are attached):

Raymond Hall

Material #	Description - Component	Condition
RAY-100B/200B	Drywall joint compound – Walls and ceilings	I

Morey Hall

- All samples were analyzed as less than 1% asbestos. Materials are considered asbestos-containing when they are analyzed as greater than 1% asbestos.

MacVicar Hall

- All samples were analyzed as less than 1% asbestos. Materials are considered asbestos-containing when they are analyzed as greater than 1% asbestos.

Stillman Hall

- All samples were analyzed as less than 1% asbestos. Materials are considered asbestos-containing when they are analyzed as greater than 1% asbestos.

Flagg Hall

- All samples were analyzed as less than 1% asbestos. Materials are considered asbestos-containing when they are analyzed as greater than 1% asbestos.

Carson Hall

Material #	Description - Component	Condition
CAR-202A	Textured plaster skim coat – Ceilings	I

Kellas Hall

- All samples were analyzed as less than 1% asbestos. Materials are considered asbestos-containing when they are analyzed as greater than 1% asbestos.

Timmerman Hall

- All samples were analyzed as less than 1% asbestos. Materials are considered asbestos-containing when they are analyzed as greater than 1% asbestos.

Stowell Hall

Material #	Description - Component	Condition
STO-102	Cementitious panel – Room 116 walls	I

Crumb Library

- All samples were analyzed as less than 1% asbestos. Materials are considered asbestos-containing when they are analyzed as greater than 1% asbestos.

Satterlee Hall

- All samples were analyzed as less than 1% asbestos. Materials are considered asbestos-containing when they are analyzed as greater than 1% asbestos.

Thatcher Hall

- All samples were analyzed as less than 1% asbestos. Materials are considered asbestos-containing when they are analyzed as greater than 1% asbestos.

Dunn Hall

- All samples were analyzed as less than 1% asbestos. Materials are considered asbestos-containing when they are analyzed as greater than 1% asbestos.

Sisson Hall

- All samples were analyzed as less than 1% asbestos. Materials are considered asbestos-containing when they are analyzed as greater than 1% asbestos.

Brainerd Hall

- All samples were analyzed as less than 1% asbestos. Materials are considered asbestos-containing when they are analyzed as greater than 1% asbestos.

Barrington Student Union

- All samples were analyzed as less than 1% asbestos. Materials are considered asbestos-containing when they are analyzed as greater than 1% asbestos.

Merritt Hall

Material #	Description - Component	Condition
MER-202	2x2 Cementitous ceiling tile – Ceiling over pool	I
MER-300A/300B	18x6 Floor tile and mastic – Women's locker room	I

PLM Bulk Asbestos Report

SET 954; C&S Engineer, SUNY Potsdam; Stowell Hall, SUNY Potsdam

Reporting Notes:

Analyzed by: Albert Grohmann

*NAD/NSD =no asbestos detected; NA =not analyzed; NA/PS=not analyzed/positive stop; PLM Bulk Asbestos Analysis by EPA 600/M4-82-020 per 40 CFR 763 (NVLAP Lab Code 200646-0), ELAP PLM Method 198.1 for NY friable samples or 198.6 for NOB samples (NY ELAP Lab ID11480); Note:PLM is not consistently reliable in detecting asbestos in floor coverings and similar non-friable organically bound materials. NAD or Trace results by PLM are inconclusive, TEM is currently the only method that can be used to determine if this material can be considered or treated as non asbestos-containing in NY State (also see EPA Advisory for floor tile,FR 59,146,38970,8/1/94). National Institute of Standards and Technology Accreditation requirements mandate that this report must not be reproduced except in full without the approval of the lab. This PLM report relates ONLY to the items tested. AIHA Lab # 102843.

PLM Bulk Asbestos Report

SET 954; C&S Engineers; Thatcher Hall, SUNY Potsdam

Reporting Notes:

Analyzed by: Karol H. Lu

*NAD/NSD =no asbestos detected; NA =not analyzed; NA/PS=not analyzed/positive stop; PLM Bulk Asbestos Analysis by EPA 600/M4-82-020 per 40 CFR 763 (NVLAP Lab Code 200546-0), ELAP PLM Method 198.1 for NY friable samples or 198.6 for NOB samples (NY ELAP Lab ID11480); Note:PLM is not consistently reliable in detecting asbestos in floor coverings and similar non-friable organically bound materials. NAD or Trace results by PLM are inconclusive, TEM is currently the only method that can be used to determine if this material can be considered or treated as non asbestos-containing in NY State (also see EPA Advisory for floor tile,FR 59,146,38970,8/1/94). National Institute of Standards and Technology Accreditation requirements mandate that this report must not be reproduced except in full without the approval of the lab. This PLM report relates ONLY to the items tested. AIHA Lab # 102843.

Analyzed by: Madell E. Collins Madell E. Collins ; Date Analyzed 12/30/2008

**Quantitative Analysis (Semi/Full); Bulk Asbestos Analysis - PLM by EPA 600/M4-82-020 per 40 CFR or ELAP 198.1 for New York friable samples or ELAP 198.6 for New York NOB samples; TEM (Semi/Full) by EPA 600/R-93/116 (not covered by NVLAP Bulk accreditation); or ELAP 198.4 for New York samples; NAD = no asbestos detected during a quantitative analysis; NA = not analyzed; Trace = <1%; Quantitation for beginning weights of <0.1 grams should be considered as qualitative only; Qualitative Analysis: Asbestos analysis results of "Present" or "NVA = No Visible Asbestos" represents results for Qualitative PLM or TEM Analysis only (no accreditation coverage available from any regulatory agency for qualitative analyses); AIHA Lab # 102843, NVLAP Lab Code 200546-0, NYSDOH ELAP LAB ID 11480.

Warning Note: PLM limitation, only TEM will resolve fibers <0.25 micrometers in diameter. TEM bulk analysis is representative of the fine grained matrix material and may not be representative of non-uniformly dispersed debris for which PLM evaluation is recommended (i.e. soils and other heterogenous materials).

Reporting Notes:

Analyzed by: Albert Grohmann

*NAD/NSD =no asbestos detected; NA =not analyzed; NA/PS=not analyzed/positive stop; PLM Bulk Asbestos Analysis by EPA 600/M4-82-020 per 40 CFR 763 (NVLAP Lab Code 200546-0). ELAP PLM Method 198.1 for NY friable samples or 198.6 for NOB samples (NY ELAP Lab ID11480); Note:PLM is not consistently reliable in detecting asbestos in floor coverings and similar non-friable organically bound materials, NAD or Trace results by PLM are inconclusive, TEM is currently the only method that can be used to determine if this material can be considered or treated as non asbestos-containing in NY State (also see EPA Advisory for floor tile,FR 59,146,38970,8/1/94). National Institute of Standards and Technology Accreditation requirements mandate that this report must not be reproduced except in full without the approval of the lab. This PLM report relates ONLY to the items tested. AIHA Lab # 102843.

Analyzed by: Madell E. Collins Madell E. Collins ; Date Analyzed 12/30/2008

**Quantitative Analysis (Semi/Full): Bulk Asbestos Analysis - PLM by EPA 600/M4-82-020 per 40 CFR or ELAP 198.1 for New York friable samples or ELAP 198.6 for New York NOB samples; TEM (Semi/Full) by EPA 600/R-93/116 (not covered by NVLAP Bulk accreditation); or ELAP 198.4 for New York samples; NAD = no asbestos detected during a quantitative analysis; NA = not analyzed; Trace = <1%; Quantitation for beginning weights of <0.1 grams should be considered as qualitative only; Qualitative Analysis: Asbestos analysis results of "Present" or "NVA = No Visible Asbestos" represents results for Qualitative PLM or TEM Analysis only (no accreditation coverage available from any regulatory agency for qualitative analyses); AIHA Lab # 102843, NVLAP Lab Code 200546-0, NYSDOH ELAP LAB ID 11480.

Warning Note: PLM limitation, only TEM will resolve fibers <0.25 micrometers in diameter. TEM bulk analysis is representative of the fine grained matrix material and may not be representative of non-uniformly dispersed debris for which PLM evaluation is recommended (i.e. soils and other heterogeneous materials).

Table I
Summary of Bulk Asbestos Analysis Results by NYS ELAP 198.4 NOB Method
SET 954; C&S Engineers; Merritt Hall / SUNY Potsdam

AmeriSci Sample #	Client Sample#	HG Area	Sample Weight (gram)	Heat Sensitive Organic %	Acid Soluble Inorganic %	Insoluble Non-Asbestos Inorganic %	** Asbestos % by TEM
01	1217-MER-201B-1		0.590	50.7	6.4	42.9	
Location:	Glue Dob Of 201A / 1st Floor Hall						NAD
02	1217-MER-201B-2		0.340	50.3	7.4	42.4	
Location:	Glue Dob Of 201A / 1st Floor Hall						NAD

Analyzed by: Madell E. Collins Madell E. Collins; Date Analyzed 12/30/2008

**Quantitative Analysis (Semi/Full): Bulk Asbestos Analysis - PLM by EPA 600/M4-82-020 per 40 CFR or ELAP 198.1 for New York friable samples or ELAP 198.6 for New York NOB samples; TEM (Semi/Full) by EPA 600/R-93/116 (not covered by NVLAP Bulk accreditation); or ELAP 198.4 for New York samples; NAD = no asbestos detected during a quantitative analysis; NA = not analyzed; Trace = <1%; Quantitation for beginning weights of <0.1 grams should be considered as qualitative only; Qualitative Analysis: Asbestos analysis results of "Present" or "NVA = No Visible Asbestos" represents results for Qualitative PLM or TEM Analysis only (no accreditation coverage available from any regulatory agency for qualitative analyses); AIHA Lab # 102843, NVLAP Lab Code 200543-0, NYSDOH ELAP LAB ID 11480.

Warning Note: PLM limitation, only TEM will resolve fibers <0.25 micrometers in diameter. TEM bulk analysis is representative of the fine grained matrix material and may not be representative of non-uniformly dispersed debris for which PLM evaluation is recommended (i.e. soils and other heterogenous materials).

GENERAL NOTES:

1. EXISTING SENSORS ARE NOT COMPARABLE WITH NEW DDC, REPLACE ALL SENSORS WITH NEW, REUSE WIRING UNLESS OTHERWISE INDICATED, VERIFY INTEGRITY OF WIRING BEFORE REUSE. SENSOR LOCATIONS SHOWN BASED ON AS-BUILT DRAWINGS, ACTUAL LOCATION MAY VARY SLIGHTLY.
2. EXISTING POINT LIST POINT ID'S ARE BASED ON AS BUILT DRAWINGS. FIELD VERIFICATION HAS SHOWN MOST TO BE ACCURATE HOWEVER APPROXIMATELY 10% WERE FOUND TO BE TERMINATE LOCATIONS. EACH POINT WILL REQUIRE VERIFICATION PRIOR TO REUSE. ADVISE IF DEVICE IS INOPERABLE OR WIRING CANNOT BE REUSED.

RENOVATION KEYNOTES:

1. EXISTING S-5 TRANE UPCM, REMOVE AND INSTALL NEW DDC PANEL. PROVIDE H-O-A SELECTOR SWITCH IN SEPARATE ENCLOSURE FOR SUPPLY AND RETURN FAN. PROVIDE CURRENT SWITCHES AND STATUS POINTS. TRANSFER 110V POWER.
2. UH-2, PROVIDE NEW THERMOSTAT, DDC CONTROLLER, REUSE WIRING, VALVE AND ACTUATOR.
3. EXISTING S-6 TRANE UPCM, REMOVE AND INSTALL NEW DDC PANEL. PROVIDE H-O-A SELECTOR SWITCH IN SEPARATE ENCLOSURE FOR SUPPLY FAN. PROVIDE CURRENT SWITCH AND STATUS POINT. TRANSFER 110V POWER.
4. EBTRON IAQ ENFORCER OUTSIDE AIRFLOW METER TO REMAIN.
5. EXISTING DHW PUMP STARTER PROVIDE COMBINATION MOTOR STARTER WITH H-O-A SELECTOR SWITCH. PROVIDE CURRENT SWITCH, STATUS POINTS AND REMOTE START/STOP CAPABILITIES. REPLACE TEMP SENSOR.
6. UFM PANEL AND AIRFLOW METER RACK, REFER TO DETAIL DWG.
7. MOD LOCATION.
8. EXISTING AHU-1 TRANE UPCM, REMOVE AND INSTALL NEW DDC PANEL REUSE DEVICES AND WIRING AS PER POINTS LIST. PROVIDE H-O-A SELECTOR SWITCHES IN SEPARATE ENCLOSURE FOR SUPPLY AND RETURN FAN. PROVIDE CURRENT SWITCHES AND STATUS POINTS. TRANSFER 110V POWER.
9. EXISTING AHU-3 TRANE UPCM, REMOVE AND INSTALL NEW DDC PANEL REUSE DEVICES AND WIRING AS PER POINTS LIST. PROVIDE H-O-A SELECTOR SWITCHES IN SEPARATE ENCLOSURE FOR SUPPLY AND RETURN FAN. PROVIDE CURRENT SWITCHES AND STATUS POINTS. TRANSFER 110V POWER.
10. EXISTING AHU-2 TRANE UPCM, REMOVE AND INSTALL NEW DDC PANEL REUSE DEVICES AND WIRING AS PER POINTS LIST. PROVIDE H-O-A SELECTOR SWITCH IN SEPARATE ENCLOSURE FOR SUPPLY FAN. PROVIDE CURRENT SWITCH AND STATUS POINT. TRANSFER 110V POWER.
11. EXISTING DELTA PANEL #3 EXCEL 5000 INCLUDES, BLDG STM PRESSURE, BLD AIR ALARM, ELEVATOR EM HI WATER ALARM, FIRE ALARM, FIRE ALARM TROUBLE, LAB AIR ALARM, PHONE CELL STATUS, ROADWAY LITES STATUS, ROADWAY LITES, -- ALL TO REMAIN. PROVIDE 3/4" EMT CONDUIT WITH 2-MULTIMODE FIBER OPTIC CABLES TO FIBER PATCH PANEL.
12. REPLACE TEMP SENSOR WITH NEW, REUSE VALVE ACTUATOR, ACTUATOR.
13. EXISTING POWER QUALITY METER. PROVIDE TIE-INS TO DDC PANEL. REFER TO WIRING DIAGRAM #20 ON DRAWING M/C-054.
14. LOCATION OF NEW STEAM SENSOR FMS26. PROVIDE 3/4" EMT CONDUIT WITH 2-#12 AND 1-#12 GROUND FROM 110V POWER SUPPLY IN KEYNOTE #11.
15. PROVIDE CURRENT SWITCH AND START/STOP RELAY FOR BOILER B-1. PROVIDE ALARM WIRING TO DDC PANEL AND CONNECT TO ALARM CONTACT IN BOILER CONTROL BOARD.
16. CW METER, REPLACE REGISTER WITH NEW PURGE TYPE, REFER TO METER SCHEDULE.
17. PROVIDE CURRENT SWITCHES AND STATUS POINTS FOR P-1A, P-1B, P-2A AND P-2B. PROVIDE H-O-A SELECTOR SWITCHES IN EXISTING VSD'S LOCATED IN MCC. REFER TO POINTS LIST FOR QUANTITIES.
18. RECONNECT WIRING FOR EXHAUST FANS LOCATED IN MCC. REFER TO POINTS LIST FOR QUANTITIES.
19. PROVIDE 3/4" EMT CONDUIT WITH 1-#22 UTP TO INDIVIDUAL CONTROL PANELS.
20. FIELD VERIFY LOCATION OF SUPPLY FAN S-8. PROVIDE H-O-A SELECTOR SWITCH IN SEPERATE ENCLOSURE. PROVIDE CURRENT SWITCH AND STATUS POINTS AS PER POINTS LIST.
21. FIELD VERIFY THE LOCATION OF THE FOLLOWING EQUIPMENT; AC-1, AC-2, CORRIDOR CUH, UH-101B, FAN COIL 1, UH-123, UH-131, UH-132 AND SUPPLY FAN SF1. REPLACE DEVICES OR POINTS LIST AND TRANSFER WIRING.

BASEMENT PLAN

SCALE: 1/16" = 1'-0"

RENOVATION KEYNOTES:

1. EXISTING WATER METER.
2. EXISTING SUMP PITS.
3. HONEYWELL CONTROL PANEL TO BE REMOVED. TRANSFER 110V POWER TO NEW PANEL IN SAME LOCATION. PROVIDE 3/4" EMT CONDUIT WITH (2) MULTI-MODE FIBER OPTIC CABLES FROM FIBER PATCH PANEL TO NEW CONTROL PANEL.
4. HV-1 HEATING COIL CONTROL VALVES. REUSE VALVE ACTUATORS. INSTALL EP TRANSDUCERS AND LOCATE IN NEW CONTROL PANEL.
5. RECIRCULATION PUMP P-HV1 FOR PREHEAT COIL. PROVIDE COMBINATION MOTOR STARTER WITH H-O-A SELECTOR SWITCH. PROVIDE STATUS POINTS AND DDC START/STOP CAPABILITIES. SEE FLOW DIAGRAM.
6. REMOVE EXISTING SENSORS AND INSTALL NEW TEMPERATURE, HUMIDITY AND LOW LIMIT SENSORS FOR HV-1. REFER TO FLOW DIAGRAM AND POINTS LIST. CONNECT TO NEW CONTROL PANEL IN THIS ROOM. PATCH HOLES IN DUCTWORK FROM SENSOR REMOVALS.
7. EXISTING DAMPERS FOR HV-1 SYSTEM. REUSE ACTUATORS. INSTALL TRANSDUCERS AS REQUIRED BY POINTS LIST AND LOCATE IN NEW CONTROL PANEL, IN THIS ROOM.
8. DOMESTIC HOT WATER SYSTEM. REFER TO FLOW DIAGRAM AND POINTS LIST FOR DETAILS. PROVIDE COMBINATION MOTOR STARTER WITH H-O-A SELECTOR SWITCH FOR P-DHW. PROVIDE STATUS POINTS AND DDC START/STOP CAPABILITIES. SEE FLOW DIAGRAM.
9. EXISTING TEMPERATURE SENSOR ON WALL. REMOVE AND REPLACE WITH NEW SENSOR AND WIRE TO NEW CONTROL PANEL.
10. SUGGESTED LOCATION FOR NEW CONTROL PANEL.
11. EXISTING 3 PHASE TEMPERATURE MONITOR. PROVIDE TIE-INS TO DDC PANEL.
12. PROVIDE CUTLER HAMMER POWER QUALITY METER. PROVIDE TIE-INS TO DDC PANEL. SEE WIRING DIAGRAM #19 ON DRAWING ATC-654.
13. EXISTING STEAM ENTRY. PROVIDE NEW FLOW METER FMS-2A. PROVIDE 3/4" EMT CONDUIT WITH 2-#12 AND 1-#12 GROUND FROM 110V POWER SUPPLY IN KEYNOTE #3.
14. PROPOSED LOCATION OF REMOTE STEAM METER DISPLAY AND FLOW PROCESSOR. PROVIDE 3/4" EMT CONDUIT BETWEEN REMOTE METER AND STEAM ENTRY IN KEYNOTE #13. INSTALL FACTORY SUPPLIED CABLING.
15. PROVIDE COMBINATION MOTOR STARTERS WITH H-O-A SELECTOR SWITCH FOR EXHAUST FANS EX-1 AND EX-2. PROVIDE STATUS POINTS AND DDC START/STOP CAPABILITIES. REFER TO FLOW DIAGRAM AND POINTS LIST FOR DETAILS.

PRE-BID SUBMISSION

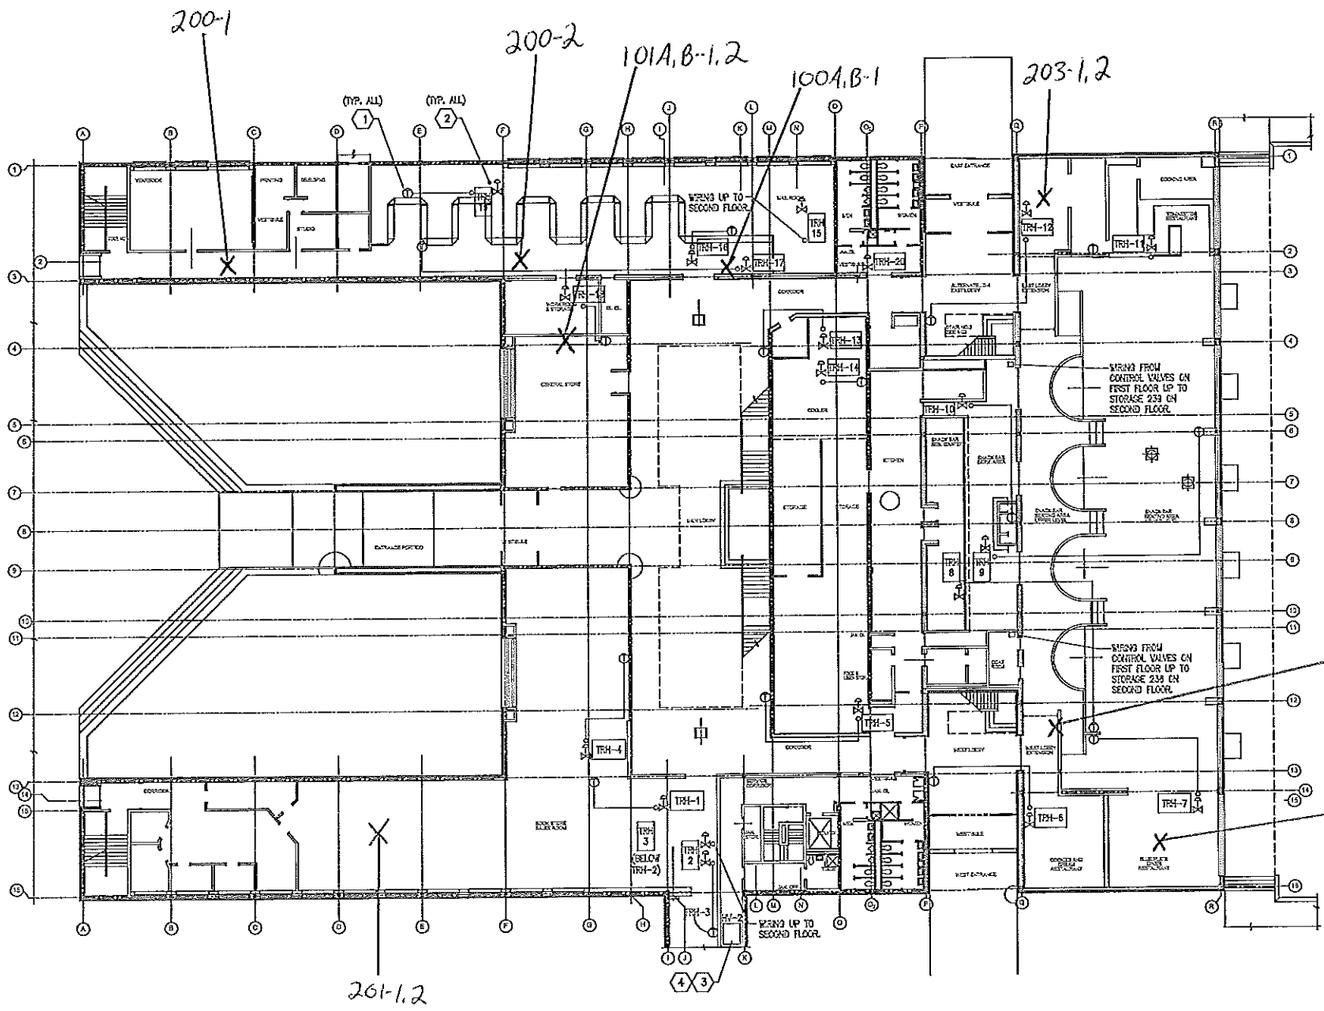
BARRINGTON BASEMENT PLAN

Project Manager: D. PORTER
Designed by: M. BOMMERMAN
Drawn by: C. PARKER
Checked by:
Date Issued: JANUARY 16, 2013
Scale: AS NOTED
Date

Project Number: 2771.00
File Name:

Drawing Number:

ATC100-29



FIRST FLOOR PLAN

SCALE: 1/16" = 1'-0"

GENERAL NOTES:

1. TYPICALLY RUN NEW WIREMOLD FROM NEW SENSORS UP ALONG WALL AND ACROSS CEILING TO REHEAT COIL CONTROL VALVE ABOVE CEILING. FIELD VERIFY EXACT LOCATION OF CONTROL VALVE BEFORE START OF WORK.
2. RUN WIREMOLD IN CORRIDOR CLOSE TO WALL, NOT DOWN MIDDLE OF CORRIDOR.

RENOVATION KEYNOTES:

1. EXISTING TEMPERATURE SENSOR FOR SPACE. REMOVE AND REPLACE WITH NEW SENSOR. RUN WIRING IN NEW WIREMOLD IN EXPOSED SPACES. CONNECT TO NEW EP TRANSDUCER AT CONTROL VALVE AND NEW CONTROL PANEL IN MECHANICAL ROOM IN ATTIC.
2. EXISTING REHEAT VALVE ABOVE CEILING. REUSE EXISTING ACTUATOR. INSTALL EP TRANSDUCER AND CONNECT TO NEW CONTROL PANEL IN MECHANICAL ROOM IN ATTIC.
3. PROVIDE H-O-A SELECTOR SWITCH IN EXISTING CONVENTION MOTOR STARTER FOR HV-2. PROVIDE STATUS POINTS AND REMOTE START/STOP CAPABILITIES. SEE FLOW DIAGRAM.
4. PROVIDE TEMPERATURE SENSORS AND EP TRANSDUCER FOR HV-2. REUSE EXISTING PNEUMATIC VALVE ACTUATOR. REFER TO FLOW DIAGRAM AND POINTS LIST FOR DETAILS.
